

App Release Notes – 07.2026

Fully Released Features

App Subscriptions locations

Drivers can now easily view all charging sites affiliated with their subscription directly in the app. This ensures you always know where your membership benefits apply before you arrive.

App Promotions locations

We have updated the promotions interface to show exactly where active offers can be redeemed. This improvement makes it simpler to find and use discounts at participating locations.

Update Lock screen copy

The app now features updated messaging on the login and lock screens to better reflect our commitment to your charging experience. This small change provides a more welcoming and professional first look when you open the app.

Bug Fixes

Lockscreen charging notification (Live Activity) does not auto-update during an active session

We fixed an issue where the lockscreen notification would stay stale, ensuring it now shows live energy and cost data during your charge.
