

App Release Notes – 02.2026

Fully Released Features

Onboarding flow optimisation for RFID ordering WLs

We've streamlined the onboarding process for ordering RFID cards in whitelabelled apps, making it faster and easier for new users to get started.

Upgrade iOS Minimum Requirement

We've updated the app to support the latest iOS requirements, ensuring compatibility and access to new features.

Increase padding when promotion & subscription available

The app now displays more space between promotions and subscriptions, making offers easier to read and interact with.

Bug Fixes

Fix timezone issues on staging

Resolved errors related to missing or incorrect time zone settings in staging environments, ensuring accurate scheduling and data display.

Some drivers can't see promotions on WL apps

All drivers can now view available promotions in whitelabelled apps, ensuring everyone has access to the latest offers.

Postcode look up for RFIDs

Address selection via postcode now works correctly, making it easier to order RFID cards and ensuring accurate delivery.

Apple "hide my email" not sending receipts

Users with Apple's "hide my email" feature now receive receipts as expected, improving transparency and record-keeping.
