

App Release Notes – 06.2026

Fully Released Features

Driver App — PAUA external Public Charging Experience

We have introduced a comprehensive public charging experience for drivers, integrating PAUA external charging services directly into the app. This allows users to access a wider network of charging locations and manage their sessions seamlessly when signing up to Fuuse Fleet.

Bug Fixes

iOS – Liquid Glass 26+ navigation header offset.

Resolved a visual alignment issue on iOS where navigation icons were not centered correctly within the header buttons.

Driver unable to update postcode via the app

Fixed a bug in the profile settings that prevented drivers from successfully updating their postcode information.

Session Ratings always 4*

Corrected a rounding error in the display of location ratings, ensuring that drivers see accurate, detailed scores for charging sites.

Percentage Rounding Issue

Resolved an issue where percentage values were being rounded incorrectly, providing more precise data throughout the app.
