

# App Release Notes – 05.2026

## Fully Released Features

### **Subscriptions – Update & payment failure states**

Drivers can now seamlessly upgrade or downgrade their subscriptions directly within the app to better suit their charging needs. Additionally, new notifications for failed payments and the ability to update payment cards ensure uninterrupted access to charging services.

## Bug Fixes

### **Driver unable to cancel an already cancelled subscription**

Corrected a display error that incorrectly prompted drivers to cancel subscriptions that were already terminated.

### **Driver unable to see mega subscription in driver app**

Fixed a visibility issue that prevented certain subscription tiers from appearing as available options for Android users.

### **Drivers app shows incorrect ongoing session**

Corrected a reporting error where completed charging sessions were still appearing as active within the driver's app.
