App Release Notes – 17.10.2025

Fuuse

What's new?

🔋 New & Improved for Drivers

See your vehicle's State of Charge (SoC) directly in-app
Now when you're charging, you'll see how full your battery is right on the session screen - no more guessing or switching apps.

Smarter Subscriptions

- **Clearer subscription details** – view available and active subscriptions from your account page.
- **No more pop-ups about charger availability** while purchasing - buy your plan without distractions.
- **Instant feedback** – once your subscription activates, the site banner updates straight away.

Performance & Polish

- Fixed unresponsive top-navigation buttons on Android (including Back, Skip & Delete Account).
- Faster load when ending a session — data clears cleanly every time.

⚙️ Under the Hood (Technical Updates)

We've completed a **major React Native upgrade (to v0.77)** to keep the app compatible with the latest Android and iOS versions — ensuring better stability, faster builds, and support for future features.

💡 What This Means for You

A smoother, faster, more reliable charging experience — with your charging info, subscriptions, and support all in one place.
