

# App Release Notes – 01.2026

## **Booking Notifications**

Know when someone's booked after you.

You'll now receive an email and push notification if another driver has a booking immediately after your session.

This helps you better manage your charging time, avoid overrunning, and be considerate of the next driver.

## **Session Ratings in the App**

Make more informed charging decisions.

Drivers can now see session ratings directly on site and charger details in the app if activated by the organisation.

You can quickly check other drivers' experiences before heading to a location, helping you choose chargers with greater confidence.

## **Activity Page**

Track your charging at a glance.

You can now view your charging activity in a clear, easy-to-read graph.

See your sessions mapped over time, understand your usage patterns, and keep better track of your charging history — all in one place.
