

Supplier name: Fuuse Limited

Publication date: 27th May 2025

1 COMMITMENT TO ACHIEVING NET ZERO

At Fuuse Limited, we don't just enable EV charging - we're helping to accelerate the UK's transition to net-zero transport while minimising our own environmental footprint. Our Carbon Reduction Plan aligns with the UK's 2050 net-zero target and ensures every charge delivered through our software supports a cleaner future.

This Carbon Reduction Plan outlines our baseline emissions, including Scope 1, 2, and selected Scope 3 categories, and the actions we're taking to reach our targets

2 BASELINE EMISSIONS FOOTPRINT

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions.

Baseline emissions are the reference point against which emissions reduction can be measured.

| Baseline Year: 2024 | |
|---|----------------------------|
| Additional Details relating to the Baseline Emissions calculations. | |
| The baseline defined relates to the Fuuse Limited and covers our UK operational boundary using Operational Control methodology. 2024 was our first year of reported emissions and is our baseline year. | |
| Baseline year emissions: | |
| EMISSIONS | TOTAL (tCO ₂ e) |
| Scope 1 | 0.073 |
| Scope 2 | 2.692 |
| Scope 3 (Included Sources) | 15.597 |
| Total Emissions | 18.364 |

3 CURRENT EMISSIONS REPORTING

| Reporting Year: 2024 | |
|-------------------------------|----------------------------|
| EMISSIONS | TOTAL (tCO ₂ e) |
| Scope 1 | 0.073 |
| Scope 2 | 2.692 |
| Scope 3 (Included Sources) | 15.597 |
| Total Emissions | 18.364 |

We have assessed the relevance and materiality of the 5 categories of Scope 3 emissions required for the Procurement Policy Note (PPN) 06/21. Based on this assessment, we have excluded the following categories from our Carbon Reduction Plan on the grounds that they are considered immaterial to our overall carbon footprint and reduction planning.

- Upstream transportation and distribution
- Waste generated in operations
- Downstream transportation and distribution

We are committed to continually reviewing this for our future reporting years and have included within our Planned Carbon Reduction Initiatives measures.

4 EMISSIONS REDUCTION TARGETS

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 14.13 tCO₂e* by 2030. This is a reduction of 23%.

Progress against these targets will be seen in this graph:

*tCO₂e – tonnes of carbon dioxide equivalent emissions

5 INTENSITY RATIOS

We have identified the following intensity ratios to provide context on our total reported greenhouse gas emissions data against our business metrics year on year.

| Period YE | | Intensity Ratio– FTE | | |
|-----------|------------------|----------------------------|------------------------------|--|
| | | tCO ₂ e/ FTE | +/- % on previous year | +/-% Baseline against Current |
| Y1 | 2024 Baseline | 0.224 | N/A | N/A |

6 CARBON REDUCTION PROJECTS

Fuuse Limited is committed to minimising our own environmental footprint and achieving Net Zero emissions by 2050.

6.1 Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented in the baseline year. The measures will continue be in effect when performing clients contracts.

- Cycle to work scheme
- EV salary sacrifice scheme

6.2 Planned Carbon Reduction Initiatives

In the future we hope to implement further measures which will be in effect when performing clients contracts, such as:

- Monitoring and measuring of our waste to identify opportunities for reduction and recycling
- Implementing a 'remote first' meeting policy to reduce travel emissions
- Updating of Company travel policies focused on carbon reduction measures
- Encourage efficient home working practices for reducing energy usage –using energy only when it's required and 'switch it off' behaviour for lighting and electrical equipment, when not in use.
- Employee climate and environmental awareness training
- Improving our data and reporting of emissions to support targeted reduction planning

7 DECLARATION AND SIGN OFF

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

Michael Gibson
Chief Executive Officer
