

App Update – Release Notes 25.06.2025

Improved QR Code Scanning

Faster access to charging with QR code scanning

Now, when you scan a QR code at a charger, it will take you directly to the correct charging location, as expected.

Why it matters:

No more delays or manual searching, just scan and charge.

Shorter Wait When Opening the App

Faster loading screen = faster charging

We've reduced the time the loading screen is shown when opening the app. The Fuuse App now loads quicker, so you can jump straight into finding or starting a charge.

Why it matters:

Less waiting, especially when you're in a hurry.

Improved Password Reset Reliability

This change supports new security workflows and ensures your reset emails and code verification work seamlessly.

Why it matters:

Easier, more reliable recovery if you forget your password.

App Update – Release Notes 25.06.2025

Cleaner Charger Pages (Banner Updates)

Removed Promotions & Subscription Tags

We've removed unnecessary promotions and subscription **tags** from charger pages.

Why it matters:

You'll now only see **one clear banner** for subscription info, meaning no clutter or conflicting info.

Subscription Banners: Updated & More Informative

We've redesigned the **subscription banners** to clearly show if a subscription is:

- **Available** (grey banner)
- **Active** (blue banner)

Tapping the banner takes you directly to the relevant subscription page.

Why it matters:

It's now much easier to see what subscriptions are available and whether you're already subscribed.

Applies across charger pages, site info and payment method selection.
