

# App Release Notes – 25.09.2025

## App Updates – What's New

We've been working to make your app faster, more reliable and easier to use. This update includes performance enhancements, analytics enhancements and general improvements.

### Enhancements

- Smoother performance through new monitoring tools to help us quickly spot and fix issues
- Analytics feature available across all White label apps
- More efficient app behaviour with some redundant processes removed

### Improvements

- Fixed an issue where the app occasionally opened to a blank screen
- Corrected a Promotions display issue, which appeared during some edge cases
- Fixed navigation in the subscription flow
- Resolved a social login issue on iOS affecting some apps.
- Fixed a display issue for Android devices
