

Platform Updates – Release Notes 25.08.2025

This release brings smoother admin onboarding, clearer charger and tariff details, automatic booking syncs, and key bug fixes to improve reliability.

Onboarding & Administration

- **Admin Onboarding Flow:** Admin users go through an improved onboarding experience, including the ability to connect directly via Stripe for driver payments
- **Simplified Onboarding:** We've removed the Getting Started page for a smoother start-up experience. New companies are directed through a refined onboarding flow, making the process much easier to complete

Billing & Invoicing

- **Connector Setup:** When adding a new connector, users must now select either AC or DC. The option for "unspecified" has been removed to ensure greater accuracy in billing and reporting

Promotions

- **Promotions API:** Now supports filtering by Group ID, making it easier to see which promotions a group is featured in

Charging Site Management

- **Charger List Enhancements:** The charger list page now shows the charger power type for each charging site
- **Tariff Visibility:** Location services now display the roaming tariff associated with the service, giving users more transparency on pricing

Dashboard Improvements

- **Collapsible Map:** Users can now collapse the map on the dashboard for a cleaner view of other data
- **Visual Tooltips:** Tooltips have been updated with improved visuals for easier navigation
