Platform Release Notes – 25.09.2025

Platform Updates – What's New

We've made a series of improvements to enhance your experience, including easier navigation, clearer information and fixes to keep everything running smoothly.

Enhancements

- Added a dynamic arrow to make opening and closing the left-hand side menu easier
- Refreshed text on the Tariffs page to make information clearer and easier to follow for users
- Improved EVSE ID handling when sites are updated, improving reliability of network connections

Improvements

- Adjusted spacing in the map drop-down menu for a cleaner look
- Updated the Access Control Profile flow so that driver selection is now optional, making the process more flexible
