

# Platform Release Notes – 03.2026

## Fully Released Features

### Remove pop out tab but keep icons

The Session Log and Site Details pages now keep important action icons visible, while removing the pop-out tab for a more streamlined experience. Users can still easily access details and edit options directly from the page.

## Bug Fixes

### Manage Maintenance Button Remains Disabled

Fixed an issue where the "Manage Maintenance" button stayed disabled on certain sites, so users can now manage maintenance as expected.

### Session Details – Driver Groups Overflow

Fixed a display issue where multiple driver groups would overflow on the session details page, so all groups are now shown clearly.

### A11Y – Modal tab control

Improved keyboard navigation within modal pop-ups, making the platform more accessible for all users.

### A11Y – Tab Control keyboard access

Enhanced keyboard accessibility for tab controls, allowing users to navigate tabs using only the keyboard.

### Improved logging for OCPI Token storing failures

Improved logging for OCPI token storage failures, making it easier to identify and resolve token issues.

### Resolve Payter RFID Failures

Resolved failures with Payter RFID, ensuring smoother and more reliable RFID transactions.
